Kotak 811 Digital Account Activation

A 15 member Team at Unicorn Ops was assigned this task. These were mostly Team members who had previously executed few BFSI campaigns. But in Digital savings accounts, this would be their maiden effort. The brief to the team was simple. Call on the given database of customers and explain the benefits of opening this Zero balance savings account and once customer gives consent, then guide the customer through the account opening journey. Incentives for the team was announced at the outset itself. The Team stuck to the script and delivered the numbers as per set daily targets. 1 out of every 3 customers called were getting converted.

Wingreens –Product range monitoring on E-commerce sites

The implementation of the monitoring system yielded a notable case study in reducing out-of-stock instances. The product monitoring availability service promptly identified patterns of out-of-stock occurrences at specific online channel locations. Analyzing this data enabled Wingreens Farms to pinpoint particular websites experiencing consistent stockouts. The company collaborated closely with these online channels to deploy dynamic replenishment strategies, ensuring timely restocking and minimizing lost sales opportunities. Within the initial three months of implementation, the proactive measures led to a 30% reduction in out-of-stock instances, contributing to a substantial increase in revenue.

Altco – Product range monitoring on E-commerce sites

Cylsys's real-time monitoring capabilities empowered Alt Co to swiftly implement agile strategies to tackle challenges such as out-of-stock instances. Results: In the initial quarter of deploying the Cylsys product monitoring availability service, Alt Co witnessed substantial improvements in product availability across all online channels. Out-of-stock instances were notably reduced by 25%, leading to a significant upswing in customer satisfaction and retention. The real-time data provided by Cylsys further enabled Alt Co to optimize production planning, resulting in a reduction of excess inventory costs.

Unicorn Ops was assigned the Task of getting the EKYC completed of PayTM customers in certain Pin codes of Mumbai. The run rate required was 300 EKYC's completed in a single day. This was a humongous task

Team 1 was of 10 Tele calling members would establish contact with the wallet customers from the given customer database and explain the need for getting the EKYC done and fixing an appointment.

Team 2 was of 60 Field executives who would be visiting the customer and completing the EKYC via smart phones and the biometric system.

Both the Teams did a splendid job and with the help of their supervisors who kept a hawk eye on the minute to minute action, ensured that the Team kept meeting their daily targets.
