Our Work - AI Capabilities

Email AI

An innovative AI-driven email marketing solution designed to revolutionize your organization's outreach strategy. With advanced analytics, personalized content generation, and automated campaign management, EmailAI ensures highly targeted and engaging emails. Boost open rates, enhance customer engagement, and drive conversions effortlessly with our intelligent, data-driven platform.

Claims Watch

The path breaking AI application which automates the review of expense claim documents submitted by employees , leveraging advanced machine learning algorithms to detect anomalies and potential fraud. Leading to a streamlined and accurate expense management process, reducing the risk of financial misconduct within the organization.

Finance Formatter

The AI application for the wealth management company efficiently reads and processes company portfolios in various formats, converting them into a structured and standardized format. This enables streamlined data management, ensuring accurate and organized information for better decision-making and enhanced portfolio analysis. The solution enhances operational efficiency and supports more informed financial strategies.

FinAnalyze

Introducing our advanced AI application designed for fund managers in AMC companies. This cutting-edge tool reads company reports across various formats, extracting critical data and saving it in structured, easily accessible formats. By streamlining report analysis, it enhances decision-making efficiency and ensures precise, up-to-date information management.

Our Work-Software development

CYLSYS
we shape your business

VDGSAIRPORTS SOLUTION

We have designed an application integration software for Safegate, Sweden that enables applications running on different servers to communicate with each other. Let's take an example of the Mumbai International /London Airport.

They run a main frame server that supports the administrative operations of the airport. They also run a parallel Gate Operating System that is responsible for guiding an airplane to its parking bay. It is very useful for These two systems to communicate to each other, but they can't because they operate on completely different architecture. What we've done is to create a Message oriented middle ware that cantrack, translate and control the flow of information between these two systems.

ERP FOR STEEL BALL MANUFACTURES

TOLIA
Tolia Group of Companies
Steel Balls, Taper & Cylindrical Rollers

The Brief to Cylsys was to build an ERP which would streamline the entire Manu facturing process. The idea was to incorporate cutting edge Technology for their entire process.

The Company manufactures steel balls and rollers in different sizes and for this, Cylsys designed and developed an ERP which streamlined the whole process. Our ERP gives an accuracy of size, counts of units, quantity of materials and the duration of preparation. Our ERP has the masters as per requirements and gives reports for their quality analysis. Our ERP has resolved their whole manual work wherein they had to manually jot down the process and use excess manpower too.

CACTUS®
WEBSITE CONVERSION ON PROJECT

Cactus Communications is a Leading name in the field of Research. They provide a host of services that support Research scholars, Universities and Institutes, Journals, Publications ,Societies, Companies, Policymakers and other entities engaged in research.

Cylsys Software played a major role in their Website conversion project. Cactus had many client websites which were not updated and were using Old framework like PHP. These needed to be converted inn HTML using NX framework and Java Script.

PFIZER DATA

Pfizer

Pfizer is one of the worlds premier Biopharmaceutical companies

Cylsys Software was assigned a project for Data Migration by Pfizer . This included extracting data from multiple sources, mapping these tables in Excel and finally Migrating it with the SQL Server. This project needed zero-error delivery which our resources executed with ease and within the given deadline.

DIGITAL TRANSACTION SYSTEM

Digital Transaction System is a utility that handles all the processing of transactions occurring in mutual fund companies .DTS works on daily basis and handles all

The transaction related data. DTS ensures that every transaction is taken care and logged into the system.

It involves Email and Fax transaction; Bank statement download and Credit Confirmation, Master/Mapping setups.It's a one stop solution for entire transaction processing.

POLLING APPLICATION

As mandated by SEBI all AMCs have to do the valuation of bonds on a daily basis. The process followed is the AMC receives a mail from either CRISIL or ICRA on a daily basis at 4.30 p.m. and this mail needs to be replied by the Fund Managers of AMCs after entering the

necessary data in the attached Excel sheet on the same day All this data needs to be stored and preserved for approximately 8 years. This entire process was being done manually which was very cumbersome and time consuming. So to enhance the process and optimize the resources it was decided to automate this entire process and store the required data in a database by developing an application for the same.

ADVANCE SUITE-N

Neogrowth is a leading NBFC which is into the Business of Personal Finance. Instant loans, Business loans and Online Seller Finance. The entire process from customer loan application, customer eligibility check, Customer KYC documents scanning and

storing, credit underwriting, loan approval & disbursal are done through their in houseCRM. All the details are stored in this application which is called Advance Suite Cylsys Software took up the task of incorporating updates and modules for this application. Cylsys had two of its resources deployed at the Neo Growth office to execute this task.

Redemption Automation

This Application fully automates the entire process of creating upload files (using CAMS file as input), uploading those files on banks website and reconciliation of payment status between CAMS file, Bank Reverse Feed and Bank Statement

Our Work-Software development

Digital Transaction System

It is a utility that handles all the transaction processing occurring in mutual fund companies .DTS works on daily basis and handles all the transaction related data. DTS ensures that every transaction is taken of care and logged into the system. It involves Email and Fax Transaction, Bank Statement Download and Credit Confirmation, Master/Mapping setups. It's a one- stop solution for whole Transaction processing.

Polling App

As mandated by SEBI all AMCs have to do the valuation of bonds on a daily basis. The process followed is the AMC receives a mail from either CRISIL or ICRA on a daily basis at 4.30 p.m. and this mail needs to be replied by the Fund Managers of AMCs after entering the necessary data in the attached Excel sheet on the same day, latest by 5.15 p.m. All this data needs to be stored and preserved for approximately 8 years. This entire process was being done manually which was very cumbersome and time consuming. So to enhance the process and optimize the resources it was decided to automate this entire process and store the required data in a database by developing an application for the same.

Real Time Transaction Credit Confirmation

This utility helps AMCs to reconcile credit confirmations on real time basis from banks,
this utility runs at a specific interval and checks for any new transactions received.
As soon as the transaction is received the utility initiates the credit confirmation process

CORPORATE SPEND MANAGEMEN   EnKash

EnKash is a Start up and has created a path breaking platform which analyses Corporate spend, payments and other Financial transactions of companies. Data for such

Analysis is taken from service providers like Tally, SAP etc through which companies register their Financial transactions. Cylsys Software creates various modules for this platform of EnKash.

Our Work-Software development

CYLSYS
we shape your business

CIOS

This enables to maintain the log of inward and outward mails, parcels, search records, generate MIS reports. This module also helps to print labels and export the existing data. The distributed process of mail management becomes centralized

Debt Requisition

There are two teams in AMCs. One is Fund Manager and other is Dealer. FM assigns the deal to Dealers then Dealers perform the operations on assigned deals. This process is automated and streamlined through the application - Debt Requisition (Order Management) System. In this system there are different roles for users so FM, Dealers and compliance can use the system according to their daily operations.

Broker Grading System

This is a desktop application developed for all the departments who participate in Broker/Firm Grading and gives their votes to each and every Broker/Firms. Once all the votes are received from the Fund Managers, Research Analysts etc., the application, calculates the Rank of the firms based on votes received. All the Reports are generated by the system. Once the reports are verified, the system sends the reports to the Brokers/Firms for their ranking

Financial DB

This application is used to manage storage and retrieval of analyst company data created in- house. Company Financials and ratings retrieval are very cumbersome and time-consuming

Our Work-Software development

Upload / Download Utilities Automation

Every department wants to automate their files. Files come from different sources(FTP/SFTP/website/Mail/Local folders) and then user does some changes/calculation/operations and then shares/uploads. We have created a system to automate the entire process. User need to define source, destination, file types and operations and that process will be automated.

Key Employee Compensation Scheme

SEBI has issued a circular on April 28th 20121 on Alignment of interest of Key Employees of Asset Management Companies (AMCs) with the Unit holders of the Mutual Fund Schemes, in terms of which a part of compensation of the Key Employees of the AMCs shall be paid in the form of units of the scheme(s), in proportion of AUM of mutual funds schemes for which they have role/oversight.

According to SEBI mandate, 20 % of the Key Employees salary has to be paid in form of units of the scheme, in proportion of AUM of mutual funds schemes for which they have role/oversight.
Our Application computes the percentage, that will be paid in form of units of the scheme. The application will calculate the amount that has to be invested in each scheme. And accordingly, the HR team will distribute the salary in different Schemes.

Medical Reimbursement & Comprehensive Health Check-up System

Cylsys Software has created a robust and easy to use system which makes the entire process digital and thereby saving time and aiding the team to execute the entire process accurately and seamlessly. The new Application makes sure that Employees are able to register their Medical claims or requests for a Comprehensive Health check up with utmost ease. The new system also, has made a huge positive difference to the Medical Administrators at the client AMC in executing processes like checking the claims, giving sanctions, releasing the sanctioned amount payments into Employee's salary accounts in record turnaround time. It is a win-win situation for all the parties involved.

Tour Management System

This application streamlines the entire Travel and Ticket booking process for Employees of an Organization who travel for official tours. This system automates various tasks and processes and simplifies Tour planning, Tour approvals. scheduling and co-ordination resulting in better services delivered and improving overall productivity. Some of the modules in this Application are- Tour Requests from Employee's/ Tour approvals by the designated supervisor, Tour Advance processing/ Tour Rescheduling and Cancellation / Travel Desk Operations/ Tour Bill claims and processing by Accounts and much more.

Our Work-Software development

IT & Fixed Assets Management System

Every Organization has an IT Department which procures IT assets (E.g. Laptops Desktops, I Pads etc) and assigns it to Employees at various locations/branches for use. These IT Assets are then tracked , audited annually, disposed of (after a particular time period), taking care of Warranties/AMC's of those IT Assets etc.
This Application covers all these functionalities and more and ensuring that the life cycle of any IT Asset right from procurement/assignment/audit disposal is captured in the system and generates various Reports to help the IT Department to keep track of these IT assets.
Similarly. the Fixed assets module covers the Fixed assets (Office furniture - Tables, chairs, sofas etc. and Office Equipment - printers, projectors, fax machines (Equipment used commonly at various office locations /branches). This module take scare of the procurement/ assigning and annual audit of these Fixed assets

Mapping Automation Project

This Project revolves around the functionality of Mapping. In certain scenarios like Employee movement like Transfer, Appointment/ Resignation there is an impact on the Business relationships which those Employees are handling for that location /Branch. This Employee movement compels the smooth transfer of Business relationships or Mapping in the system from the Old employee to the new Employee at that location /Branch.
This Application automates the entire Mapping process which was earlier manual with its own share of manual interventions and rectification of errors , standardizes all the Masters and its maintenance and streamlines the entire process for all the stakeholders in the process.

Index Value Download Automation

In Fund Houses Index Values are monitored and stored on daily basis. All the BSE , NSE , Bloomberg , IIFL indices and their NAV values are extracted from the website and stored into the DB using through Automation.
An automated utility is executed at schedules time interval to check the data from BSE /NSE websites and once the data is available on the Source site, this utility picks up the Values and uploads it into the Database. This saves a lot of time and effort of Business user at the peak hours

Red Analysis

• Fund Houses has to Reconcile the data and Investments received on Daily basis.
• Once the Reconciliation is done , the Data is stored into the Master DB and many Age wise Reports are prepared.
• This Web Application ,enables the user to bulk upload the Redemption and Sales files and prepares the Age wise Reports.
• The whole process of data Reconciliation verification from KARVY , Tag Updating and Report Generation is performed by this application

Our Work-Software development

Vendor Payment Module

This is Web application for Managing all the Payments and Invoices pertaining to Vendors . This applications helps in Generating the Invoices, GST Calculation. Generating Monthly Reports ,Quarterly Reports etc.
It maintains and stores the Vouchers and Invoices paid to the Vendors.
Reporting module have filter options for , user can customize search the Reports

Kotak 811 product activation

Kotak Mahindra Bank is one of the leading private Banks in India and offers Banking products and financial services for Corporate and Retail customers in the areas of personal finance, Investment Banking, Life Insurance and Wealth The Client Kotak Mahindra Bank wanted to promote and get its newly launched digital savings account "Kotak 811" activated by the maximum number of custo mers in Pan India. The Unicorn Ops Team started slow, but gradually did such a fantastic job that they scaled up in no time to 2000 plus accounts month on mo nth. The Team were self motivated to achieve the daily targets. So
The entire success of this campaign goes to the wonderful team of agents and the Supervisors.

Unicorn Ops

Wingreens it staffing

Wingreens major share of Sales and distribution is done Online through the various Ecommerce websites like Big Basket, Big Basket Daily Amazon, Flipkart, Milk Basket, Super daily and Food delivery Apps like Swiggy. Wingreens wanted all   these
portals monitored on a daily basis for the availability of their products , offers being displayed and what the competition was offering.An 8 member Team at Unicorn Ops having experience in Data mining,

PAY TM

Unicorn Ops was assigned the Task of getting the EKYC completed of PayTM customers in certain Pin codes of Mumbai. The run rate required was 300 EKYC's completed in a single day.

This was a humongous task Team 1 was of 10 Tele calling members would establish contact with the wallet customers from the given customer database and explain the need for getting the EKYC done and fixing an appointment.

HDFC Lead

We generate around 3000 leads for HDFC from various online platform including Facebook Campaigns, Email Automations, Google Ad words and LinkedIn. Depending upon the policy of the Banks that they source and their requirements, crisp data was provided to them   which included customer base that matched the criteria of the bank, thus saving them the evaluation time and having a good conversion result from the same

App PDF Form Development for Schemes

• Scheme forms are critical asea Investors fill these forms to invest in various schemes. The Forms have to be easy to read and filled by the Investor
• Cylsys has created such form design and made it editable so that investor can fill the details.
• These forms are available on client's website.
• These forms with client data via PDF forms are stored on the central server for reporting, compliance and audit purposes.
